Ideation Phase
Define the Problem Statements

Date	29 October 2026
Team ID	N/A - individual project; no Team ID provided
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem	I am	I'm trying to	But	Because	Which makes me feel

Statement (PS)	(Customer)				
PS-1	An EV analyst or student	Compare EV sales and vehicle categories across a large dataset	Relevant information is spread across many fields and requires repeated manual comparison	There is no single, interactive view in the starting workflow to compare categories and regions quickly	The analysis feels time-consuming and difficult to explain
PS-2	A planning or research stakeholder	Explore battery types, driving range, capacity, price and degradation together	Metrics are stored in separate columns and can be hard to compare consistently	Without a coordinated dashboard and narrative, useful patterns are harder to scan	The comparison feels fragmented and uncertainty remains

Note: Personas are analytical assumptions for the project brief. No formal interviews or surveys were conducted.
