Team ID	N/A - individual project; no Team ID provided
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

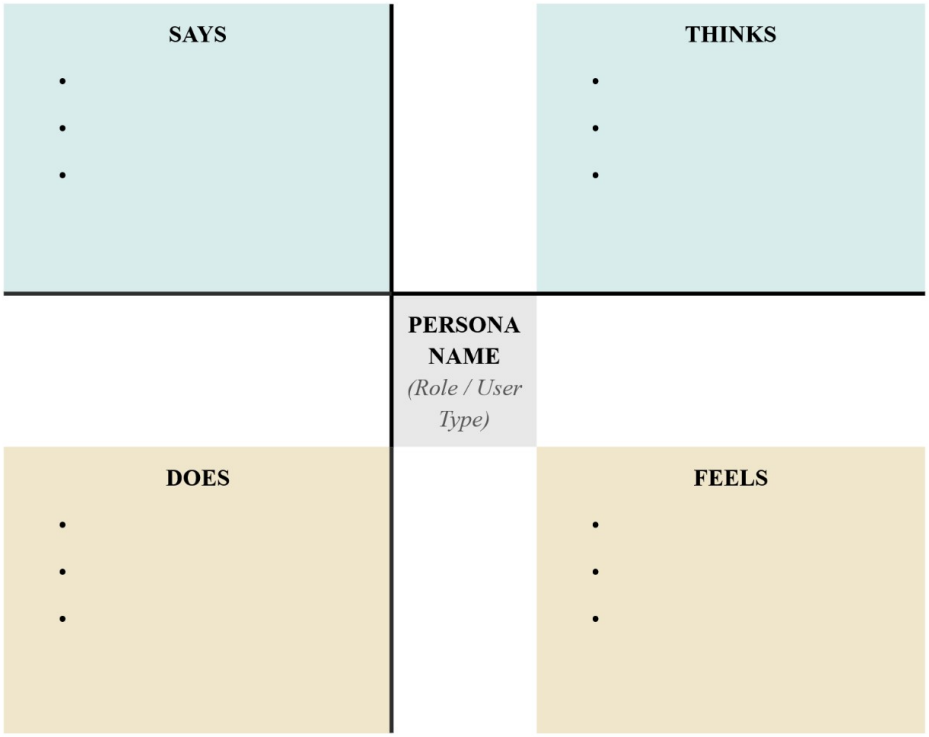

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Completed Empathy Map - Assumption-Based Persona

Note: No formal user research was conducted. The statements below are design hypotheses for a potential dashboard user, not interview quotations or measured user feedback.

Persona / User Type	Says	Thinks	Does	Feels
Student / EV analyst exploring a structured EV dataset	"I need to compare categories and technologies without manually scanning every column."	"Which recorded segments and battery types stand out, and what do the values actually represent?"	Filters by region, model year, category and battery type; compares charts; opens the Story; checks tooltips.	Initially overloaded by fields; expects a clearer, more confident interpretation after organizing the views.
