| **Team ID** | N/A - individual project |
| **Project Name** | Electric Vehicle Market Performance & Insights |
| **Maximum Marks** | 2 Marks |

## Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

| **Phase of Journey** | Stage 1: Discover need | Stage 2: Explore and compare | Stage 3: Interpret and share |
|---|---|---|---|
| **Actions** *What does the customer do?* | Identify the analysis question; open the site. | Select filters and compare categories / battery types. | Review the Story and share the relevant view. |
| **Touchpoint** *What part of the service do they interact with?* | Flask landing page; dashboard title and KPIs. | Tableau filters, charts and tooltips. | Three-scene Story and public links. |
| **Customer Thought** *What is the customer thinking?* | Where should I start? | How do groups differ? | What can I safely conclude? |
| **Customer Feeling** *What is the customer feeling?* | May feel overloaded by raw fields. | May feel more oriented while comparing views. | May feel better informed by a structured narrative. |

| | | | |
|---|---|---|---|
| Individual project owner: Prasiddha Khanna. | Data preparation, SQL and Tableau design. | Dashboard filters and chart validation. | Story and Flask website integration. |
| Improvement opportunities | State that the data is synthetic and define each metric. | Verify filter scope, labels and tooltips across all intended worksheets. | Test public Story access, improve mobile layout and collect actual user feedback later. |

Note: this map is an assumption-based persona journey; no formal user interviews or surveys were conducted.
